Update on Yvonne Hall from John Cannon

**Virginia Elks Association Youth Camp
Millboro, Virginia**

From Mike via Yvonne's brother.....

Yvonne is doing as well as can be expected. The only part of her body that she can use right now is her right arm. She still will require several surgeries and treatments before she is well enough to be moved to a rehab facility in the Clifton Forge area. No estimate has been made on the time frame yet. Several members of her family are in Tennessee visiting with her.

Yvonne's daughter is at home but she has her jaw wired shut for now but doing OK overall. The girl traveling with them is still in the hospital in Tennessee. She has a broken neck and expects to be in a hard cast for at least 8 months. As she improves she will also be sent back to Clifton Forge.
